

The FCP120 is one of Fortune CP's large size modules. It is specifically dedicated to large scale/grid connected applications. The module is made from high efficiency multi-crystalline solar cells.

The junction box has 2 voltage options of 12V and 24V. The module adopts tempered glass with high transmission rate and strong mechanical resistance.

The FCP 120 module ensures more power homogeneity in installations, and a financial investment corresponding to the renewable energy generated.

APPLICATIONS

Grid connected large scale system
Power plants
Off-grid home/industrial system

Water pumping
Telecommunications
Rural Electrification

FEATURES

- High Efficiency crystalline solar cells: conversion efficiency more than 15.5%
- Heavy duty anodised aluminium frame, very convenient for installation, strong mechanical resistance
- Adopting tempered glass with high transmission rate and strong mechanical resistance
- Waterproof versatile junction box provides flexibility of connection.
- Good performance in atrocious weather conditions such as wind, hail etc
- Quality assurance: ISO 9001, CE
- Efficiency warranty: 25 years
- Product warranty: 5 years

ISO 9001

CE

ELECTRICAL CHARACTERISTICS

Maximum power	W	120
Optimum operating Current	A	6.82
Optimum operating Voltage	V	17.60
Short Circuit Current	A	8.00
Short Circuit Voltage	V	21.60

MODULE DIMENSIONS

Module weight	Kg	16
Module size	mm	1460 x 810 x 33
Cell size	mm	125 x 125
Packing configuration	Modules	5 per carton
